

Our Offering - Civil Engineering and Infrastructure

Airports and Runways

Airport infrastructure works are a core part of our business and our teams are experienced in providing the engineering skills and technologies necessary to deliver both airside and landside support facilities. We work closely with airport operators, owners and carriers – as well as with the general public. BHM understand the need for maximum safety and security within 'live' environments.

Marine and Ports

BHM has been associated with many marine and port projects and have acquired experience in developing ports and harbour construction specifically within the Bahamas.

We place an importance on all aspects of planning, safety and responsible working methods to respect the local environment and communities where we operate.

Site Development

BHM has an excellent record of accomplishment in the private site development and subdivision construction sector, supplying the necessary experience and skill to undertake projects of any size and complexity.

BHM undertakes all planning, procurement, and construction works all the while working closely with clients, to develop the most appropriate infrastructure solutions to ensure that we exceed customer expectations.

To view completed projects, refer to our Company Project Sheets or visit our website at www.bhmgroup.com

Our Offering

Sea Defence and Marine Works

With increased concerns for Climate resilient costal management and infrastructure works to combat potential risks, included those associated with climate change, there is a need for sustainable coastal protection infrastructure improvement works, to protect both economies and local communities.

We need to promote development that does not destroy our environment but enhances it
